Profile

Jason Adolph, MS, ATC/L has been practicing Athletic Training services in outpatient physical therapy for nearly 17 years. Jason is currently treating patients out of our Joliet facility.

Jason is skilled in treating a wide variety of orthopedic injuries. He has significant experience working with the athletic and worker's compensation population and has rehabbed several athletes, general population, and work conditioning patients. Exceeding expectations of the patient is of the utmost importance to him and drives his passion for this field. He believes in open communication with the MD and the team approach to returning patients back to health.

Jason enjoys spending time with his family, watching and playing sports, and other outdoor activities.

Education

- Bachelors of Science, Illinois State University
- Masters of Science focus in Biomechanics, Illinois State University
